**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-2, 15, 17, 19 classified in class 715, subclass 505. (Form)
  - II. Claims 3-12, 16, 21, 23-25 classified in class 715, subclass 506 (Form Creation)
  - III. Claims 13-14, 18, 20, 22 classified in class 715, subclass 506 (Fitting data into field on form)

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because invention I provides a form environment, while invention II provides for form creation within that form environment and invention III provides for the manipulation of the contents of those forms. The subcombination has separate utility such as invention II being useful for generating forms that related to predefined sets of properties, which can then be filled in. Also, invention III has separate utility that it can be used to coordinate workflow for pages.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications, restriction for examination purposes as indicated is proper.
